Hotpoint iced diamond freezer settings. Hotpoint iced diamond fridge settings.

This will disappear once the door is closed and the Larder allowed to defrost and drain the moisture away. The cable should be cut as close as possible to the moulded plug. This is not a defect, it is normal. The food inside the refrigerator is beginning to freeze. Before using the appliance please read the instructions below. The appliance makes a lot of noise. If the socket is incompatible with the plug, ask an authorised technician to replace it (see Assistance). There is water at the bottom of the refrigerator. PLEASE PHONE US TO REGISTER YOUR APPLIANCE AND ACTIVATE YOUR 5 YEAR PARTS GUARANTEE ON 08448 24 24 24 Replacing fuse covers: When replacing a faulty fuse, a 13amp ASTA approved fuse to BS 1362 should always be used and the fuse cover re-fitted. The refrigerator and the freezer do not cool well. Remove the fuse. 2.If the floor is not perfectly horizontal, make the necessary adjustments by tightening or loosening the single foot at the front of the appliance. The internal refrigerator makes a slight noise even when the compressor is off. Positioning and connection Positioning 1.Place the appliance in a well-ventilated humidity-free room. The water discharge hole is blocked (see Maintenance). The socket is compatible with the plug of the appliance. The door is not closed properly or is continuously opened. The outside ambient temperature is very high. The thickness of the frost exceeds 2-3 mm (see Maintenance). The food is in contact with the back inside wall of the refrigerator. 3.Leave a space of at least 10 cm between the top part of the appliance and any furniture above it, and at least 5 cm between the sides and any furniture/side walls. 5.In order to maintain the correct distance between the appliance and the wall behind it, fit the spacers supplied in the installation kit, following the instructions provided. They contain important information for safe use, for installation and Care of the appliance. If the fuse cover is lost, the plug should not be used until a replacement is obtained. Covers for spare fuses: If a replacement fuse cover is installed, it must be the correct color as indicated by the colored marking or color embossed in words based on the plug. O-The power cord is wired directly in a 13AF cable socket, controlled by a switch (in accordance with BS 5733) which is accessible without moving the appliance. Bother Please maintain these operating instructions for the future reference. If the switch is not in position on the position and a serious frosting persists, set the temperature adjustment temperature (see page 5 for details) in a lower position. However, if we participate in then it is not the failure of the product or bankruptcy has been caused by damage, improper use or incorrect installation, charges will apply. Troubleshooting 10 GB If the device does not work, before calling assistance (see assistance), check a solution from the following list. This is normally for the cooling function of the Larder compartment, in particular the insononed period. Electrical connections After the appliance has been transported, position it very carefully and wait at least 3 hours before connecting it to the mains. If the ambient temperature is 16 coated in a lower, (for example the product is in a garage or in a building in the garage or outside), for the refrigerator for operations tocorritically the switch "fast" must be in "a" position (seeep 7 for details) don't we try our advice if our advice fails to solve The problem with your home appliance, call us on 08448 224 224 to organize a visit engineer. The appliance has not been installed on a surface. se da(artsinis eroirefni etrap allen atautis itad id attehgrat allus itacidni irolav i art aserpmoc eresse eved enoisnet aL -ã çÀ .aserp alla attada is non es atinrof anips al eritlams e otailgat anips alled otnemiltamS .arret a otagelloc eresse eved oihtcerappa otseuq :ENOIZNETTA)enoizallatsni'1 erede'v(ollevil Bother Before placing the new device in operation, GB carefully read these instructions for use. The doors do not close correctly or the gaskets are damaged. The doors are open too frequently. - The temperature adjustment knob is not in the correct position - the refrigerator or freezer have been filled too. Leveling 1. Install the appliance on a plane and a rigid floor. The engine works continuously. Changing the plug: Removing the plug If the appliance has a printed plug does not rehabilitate and you should want to remove it to add a longer cable or to reiterate the network cable through partitions, units etc. - The socket can withstand the maximum power of the appliance, which is indicated on the data plate located on the lower left side of the refrigerator (eg 150 W). Do not use extension or multiple outlets. excess moisture / ice occurs if the door of the pantry is open for prolonged periods. Or visit www.hotpointservice.it product failures are completely covered by your 12 months of parts and work guarantee. Pass them to possible new owners of the appliance. Bother The manufacturer declines each responsibility in the case of safety measures are not observed. "Velocet freezer" (see page 7 for details) is not in the location °C, this will cause 100%. The cable must not be bent or compressed.! Once the appliance has been installed, the power cable and the electrical outlet must be easily accessible. Before inserting the plug in the electrical socket, they guarantee the following: The appliance is connected to the ground and the plug complies with the law. The temperature adjustment knob is not in the correct position. 2. Do not obstruct the grids fan Malfunctions: Internal light is not affirmed. Please make sure that: - The plug is replaced by a Rewibleable 13AP plug fenced by the BSI approval brand. Bother The cable must be controlled regularly and replaced by from Only technicians (see assistance). WARNING: To avoid the risk of shocks, do not insert the discarded plug into a socket elsewhere. The appliance is supplied with a 13 amp melted plug which can be inserted into a 13 amp socket for immediate use. The appliance has been installed between the cabinets that vibrate and produce noise. 4. Make sure that the appliance is far from any heat source (direct sunlight, electric stove, etc.). The compressor and the condenser emit heat and require good ventilation to work properly and save energy. Frozen water on the back of the refrigerator excess moisture / ice excess humidity / ice excess moisture / ice excess moisture / ice on the back on the back of the back on the back of the refrigerator refrigerator refrigerator refrigerator Refrigerator Possible causes / solutions: plug has not been inserted into the electrical outlet, or not far enough to establish contact, or there is no household.
